340 Photovoltaic panel reserved hole

Overview

Its pre-drilled holes greatly simplify mounting, making it highly suitable for motorhomes, boats, campervans, and off-grid rooftops. Built with a corrosion-resistant aluminum frame, this panel withstands tough weather, including strong winds (up to 2400Pa) and heavy snow loads. Most modern solar panels feature pre-drilled holes in their aluminum frames. Different mounting systems exist, including roof-mounted, ground-mounted. Assembled with high-efficiency PERC cells, the half-cell configuration of the modules offers the advantages of higher power output, better temperature-dependent performance, reduced shading effect on the energy generation, lower risk of hot spot, as well as enhanced tolerance for mechanical.
