

595w solar panel output voltage

Overview

The specifications include STC values for maximum power output (595W), voltage (45. The module's 595W output, coupled with its half-cut cell technology and multi-wire configuration, offers dependable power generation while minimizing the effects of shading and micro-cracks. Bifacial Performance - Rear-side power generation adds up to 25% additional energy yield, depending on. A 595-watt solar panel is designed to generate 595 watts of power under optimal conditions. 11 A, Temperature Operating Range -40 to 85 Degree C. More details for GS10-M156-WF-595W can be seen below. High salt mist and ammonia resistance. With advanced N-Type half-cell architecture, bifacial glass-on-glass durability, and up to 595W front-side power output, this module maximizes long-term energy.
