[5G NR Network Interfaces: Xn, NG, E1, F1, F2 Explained](#)

We'll explore the Xn, NG, E1, F1, and F2 interfaces, highlighting their functions and locations within the 5G RAN and 5GC. Our information is based on the 3GPP TS 38.300 specification. The 5G NR network is composed ...

[What is the 5G protocol stack?](#)

What is the 5G protocol stack? The 5G protocol stack is the architecture of protocols within a 5G network that perform specific functions like managing data transmission, error correction, and resource ...

5G Base Station Architecture

The gNode B and AMF communicate using the Next Generation - Control Plane (NG-C) interface, which employs the Next Generation Application Protocol (NGAP) to transfer signaling messages. These ...

5G RAN Architecture: Nodes And Components

Discover 5G RAN and vRAN architecture, its nodes & components, and how they work together to revolutionize high-speed, low-latency wireless communication.

What air interface protocol stacks do 5G base stations support?

The air interface protocol stack for a 5G base station typically includes these protocols: NR (CU/DU)AP protocol: NR control-plane and user-plane protocol, where CU refers to the control unit and DU ...

5G System Overview

In the NSA architecture, the (5G) NR base station (logical node "en-gNB") connects to the (4G) LTE base station (logical node "eNB") via the X2 interface. The X2 interface was introduced prior to Release ...

[5G Protocol Stack: Layer 1, Layer 2, and Layer 3](#)
