

# 78 photovoltaic panel balance axis dimensions

## Overview

---

Common dimensions are approximately 65 x 39 inches. Panel dimensions are influenced by wattage, cell technology, and panel design, which means sizes will always vary. Furthermore, they agreed that 78-cell panels will have to measure 2,465x1,134mm and have a mounting hole spacing ranging from 400mm to 1,500mm. Given their large physical size, 72-cell solar panels may be awkward to carry, which is why two people are often required for. Understanding photovoltaic (PV) roof panel specifications and dimensions is critical for optimizing energy output, cost efficiency, and structural compatibility. This guide breaks down key technical parameters, industry trends, and practical considerations to help you plan a solar installation?

. Standard Residential Panels Optimize Space and Handling: The industry-standard 60-cell panel dimensions (65" x 39" x 1.
