

A complete list of small wind turbine models

A complete list of small wind turbine models

[Everything You Need to Know About Small Wind Turbines](#)

Whether you're looking to power an off-grid home, complement solar energy, or simply embark on a rewarding DIY project, small wind turbines offer a practical and meaningful solution. In the following ...

[Best Small Wind Turbine Generator \[Updated: February 2026\]](#)

A small wind turbine generator is a device that converts wind energy into electrical energy, typically for individual or small-scale use. It generally consists of a rotor, a generator, and a tower ...

[The Small Wind Turbine Catalogue](#)

The catalogue presents manufacturers of small windmills of up to 50 kW, coming from 104 companies spread in 28 countries, for a total of 302 models.

Small Wind Turbines Types

Discover the various types of small wind turbines, including horizontal, vertical, and Savonius rotors, and learn more about them.

ESS

Small wind turbine

Small wind turbines, also known as micro wind turbines or urban wind turbines, are wind turbines that generate electricity for small-scale use. These turbines are typically smaller than those found in wind ...

[Guide to Small Wind Energy Systems](#)

The key feature of a small wind energy system is the wind turbine. The turbine uses the energy of motion (kinetic energy) from the wind to turn a shaft, thus making mechanical energy.

[Introduction to Small Wind Turbines](#)

This introductory contribution is intended to provide an overview of small wind turbine classification options and an insight into the current market situation of available small wind systems.

[Small Wind Turbine Handbook 2026 - Size, Site & Install Your System](#)

Small wind turbines (1-10 kW) represent the sweet spot for most residential applications. A 5-10 kW system can potentially supply a significant portion of an average home's electricity needs ...

[Micro Wind Turbine Manufacturers - List - Green World Investor](#)

Small wind turbines are more suitable for rural settings that are exposed to strong and consistent wind. Households usually use micro wind turbines that are smaller than 5kW.
