

Are photovoltaic panels still falling in price

Overview

Residential solar prices are falling lower than ever before, said marketplace operator EnergySage in its biannual solar and storage marketplace report. The median quoted price on its platform reached \$2.50 per watt in the second half of 2024, falling 6%. Quotes. Are solar panels still getting cheaper in 2026 or have we reached the bottom?

The answer is not a simple yes or no. Solar pricing in 2026 is shaped by manufacturing costs, supply chain, global demand, government policies and new technologies all moving at the same time. In this guide we will break. For decades, one of the near-constants in the shift to renewable energy was that solar panel prices were decreasing. This downward curve hit a bump in 2020. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market.
