

# Bangladesh solar smart system

## Overview

---

While rooftop solar continues to grow, Bangladesh must explore more effective alternatives to increase the share of renewables in its overall energy mix. Advances in solar, storage, and smart-grid technologies offer opportunities to leapfrog traditional power systems. [Dhaka, Bangladesh, 16 May 2025] Huawei has recently introduced an advanced energy storage system to make it easier to store and supply electricity generated by solar power plants. Ni Xiaopeng (Liam), Managing Director of Huawei South Asia Digital Power Business, unveiled this new ESS system to the. Current solar home systems are limited in capacity and continue to remain prohibitively expensive for a large portion of the 65 million people who do not have access to the grid in Bangladesh. SOLshare is a green utility company creating a global network of smart distributed solar PV and storage assets at the nexus of energy and transport to increase renewables to the grid while putting more money into the pockets of 5 million electric three-wheeler drivers in Bangladesh today. So far Grameen Shakti has installed more than 1.8 million SHS and holds the eminence of implementing. Rooftop solar is steadily expanding, with 4,267 net-metered systems installed nationwide to date. Experts estimate this potential at 50,174.
