

Base station is a mobile communication system

Overview

A base station is a fixed transceiver that serves as the central communication point for mobile devices within a defined geographical area, known as a cell. It is sometimes called a cell tower. The present-day tele-space is incomplete without the base stations as these constitute an important part of the modern-day scheme of wireless communications. These types of objects are an inevitability since they serve the purpose of. Base station (or base radio station, BS) is - according to the International Telecommunication Union 's (ITU) Radio Regulations (RR) [1] - a " land station in the land mobile service. They provide the coverage you need for calls and data.
