

# Belgian iron-lithium battery energy storage container prices

## Overview

---

All-in BESS projects now cost just \$125/kWh as of October 2025. With a \$65/MWh LCOS, shifting half of daily solar generation overnight adds just \$33/MWh to the cost of solar. "Lithium-ion prices in Benelux dropped 18% year-over-year due to localized production," reports the European Energy Storage Monitor. A 2 MWh lithium battery system was deployed to support crane electrification. Project highlights: Antwerp's energy storage market is evolving faster. Ember provides the latest capex and Levelised Cost of Storage (LCOS) for large, long-duration utility-scale Battery Energy Storage Systems (BESS) across global markets outside China and the US, based on recent auction results and expert interviews. For utility operators and project developers, these economics reshape the fundamental calculations of grid. As we've explored, the current costs range from EUR250 to EUR400 per kWh, with a clear downward trajectory expected in the coming years. This article breaks down cost drivers, industry trends. Belgium's push toward renewable energy has made energy storage battery systems a hot topic.
