

Bishkek school uses 100kW folding modular energy storage system

Overview

The installation includes solar panels with a total capacity of about 50 kW and an energy storage system (BESS) with a capacity of 200 kWh. First Deputy Chairman of Cabinet of Ministers Daniyar Amangeldiev attended the signing ceremony of a memorandum of understanding between the Ministry of Energy and three international companies, leaders in the supply, installation, and assembly of energy storage systems. This project, carried out with the support of the Ministry of Economy and Commerce of the Kyrgyz Republic. The city's new energy storage initiative addresses three critical needs: "Energy storage isn't just about batteries - it's about building economic resilience. " Recent data reveals. As cities like Bishkek face increasing energy demands, innovative solutions like the Bishkek Energy Storage System are becoming critical. This technology isn't just about storing power—it's about reshaping how communities manage renewable energy, stabilize grids, and reduce operational costs.
