

Black Mountain solar Panel Power Generation Project

Overview

The Black Mountain solar farm, which was built by SOLON and is owned by Duke, is under contract with UniSource Energy Services (UES) and began operating in mid-December, according to SOLON. The utility is purchasing the power produced by the farm under a 20-year power purchase. CHARLOTTE, N. C. If approved, El Paso Electric, in partnership with EDF Renewables Distributed Solutions, Inc., would be authorized to construct, operate, maintain. Power transmission lines extend across the desert landscape in an undated BLM photo. The federal agency, the Bureau of Land Management, is seeking public comment starting Friday, March 28, until April 28, on a proposed Black Mountain transmission line project near Las Cruces. This plant feeds the UniSource grid., a PV manufacturer and project developer, has more than 60 megawatts of projects in the state—most completed, while Duke Renewable Energy, which owns the project, has expanded to 37 megawatts. Installing solar panels in mountainous areas like Black Mountain presents unique challenges—steep slopes, variable weather, and uneven sun exposure.
