

Bloomberg New Energy Storage

Overview

After a historic 2025, when global BESS capacity surpassed 250 GW and overtook pumped hydropower, momentum is set to accelerate in 2026. Key markets are expanding, emerging regions are stepping into the spotlight, and battery storage is increasingly replacing gas generation. Since 2024, gigawatt-hour projects have been commissioned or started construction in not only the US and China, but also Saudi Arabia, South Africa, Australia, Netherlands, Chile, Canada and the UK. What to expect in the. Bloomberg NEF says the tumbling cost of batteries is set to drive a boom in the installation of energy storage systems around the world in the years from now to 2040. This has led BNEF to significantly increase its forecast for global deployment of behind-the-meter and grid-scale batteries over. Global energy storage additions are on track to set another record in 2025 with the two largest markets – China and US – overcoming adverse policy shifts and tariff turmoil. Hitachi hired a sale advisor and distributed description material about its Hitachi Vantara business to interested parties.

Bloomberg New Energy Storage

[BloombergNEF: Stationary storage installations surge to 170 GWh in ...](#)

BloombergNEF reports that energy storage systems in the U.S. and Europe average around four hours in duration, while that number decreases to two hours in China, which is the ...

[Bloomberg New Energy Finance significantly increases its behind-the-](#)

Energy storage will become a practical alternative to new-build generation or network reinforcement. Behind-the-meter storage will also increasingly be used to provide system services on ...

[Global Energy Storage Boom: Three Things to Know](#)

Global energy storage additions are on track to set another record in 2025 with the two largest markets - China and US - overcoming adverse policy shifts and tariff turmoil.

[Global Energy Storage Growth Upheld by New Markets](#)

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector ...

[Energy Storage Outlook: The expanding role of BESS in global...](#)

The battery energy storage market continues its rapid growth, reshaping power systems worldwide. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook ...

[Hitachi Vantara may be up for sale](#)

Bloomberg reports Japanese multi-national conglomerate Hitachi Ltd. is aiming to sell off its Hitachi Vantara data storage subsidiary for up to ¥200 billion (\$1.3 billion). Hitachi hired a sale ...

[What are the key trends in the energy storage industry in 2026?](#)

A few days ago, Bloomberg New Energy Finance, a top international research institution, released an authoritative report predicting several major trends in the energy storage industry in 2026.

[Lithium May Get Much-Needed Demand Boost From Battery Storage](#)

Lithium bulls are betting on energy storage systems as the next meaningful pillar of demand for the battery metal, nudging the global market back toward balance after years of oversupply.

[AlphaESS Recognized as Tier 1 Energy Storage Manufacturer by](#)

AlphaESS, a leading global provider of battery energy storage systems (BESS), has earned a place on this highly anticipated list, reflecting its outstanding comprehensive strength.
