

Brazil energy storage project

Overview

WEG has announced plans to build a 2 GWh battery energy storage systems plant in Itajaí, Brazil, backed by BRL 280 million in financing. The automated facility will feature testing labs, autonomous logistics and generate 90 direct jobs. Brazil's long-awaited capacity reserve auction for battery energy storage is scheduled for April 2026, following a year of rulemaking that expanded the expected supply volume and introduced new legal and regulatory constraints. We energized the country's first project in 2022 at the Registro Substation (SP), one of the facilities responsible for supplying electricity to the southern. The forecast is for storage systems with up to 2. TBEA and CUBE ENERGY have formalized a partnership focused on the development and supply of BESS (Battery Energy Storage Systems). The Ministry of Mines and Energy (MME) has opened a 20-day public consultation on the framework for the country's first major capacity auction dedicated to energy.

Brazil energy storage project

Energy storage

Energy storage It is a source of pride to be the pioneering company in large-scale energy storage in batteries within the Brazilian transmission system. We energized the country's first project in 2022 at ...

[How Brazil's first capacity reserve auction of 2025 could impact](#)

Changes to Brazil's first capacity reserve auction of 2025 could undermine the expansion of the procurement regime to include battery energy storage systems (BESS) in the second exercise ...

[Regulatory changes could shape Brazil's 2026 battery storage auction](#)

Brazil's capacity reserve auction for battery energy storage systems (BESS), first anticipated in 2024, moved closer to execution in 2025 as projects advanced and auction rules were
