

Bulgarian Photovoltaic Energy Storage Containerized Low-Voltage Investment

Overview

The RESTORE program was approved by Bulgaria's Ministry of Energy in April 2025 with a total investment of 1.7 GWh, as part of the EU's Recovery and Resilience Facility, attracting significant interest from foreign and domestic companies alike. Substantial investment will be required, as the energy system transitions towards a more diverse energy mix, including high levels of renewable generation and new approaches to power system engineering and management. The black asphalt shimmers with heat as the road winds through the dappled green of the ancient forests of Strandzha Nature Park, the largest protected area in Bulgaria. After a steep descent. Three years ago, SCU deployed the country's first 40ft containerized energy storage system at a solar farm in Bulgaria, setting a precedent for large-scale industrial and commercial energy storage. 4 GWh of Battery Energy Storage Systems (BESS).
