

# Colleges and universities that offer microgrids

## Overview

---

Many of these institutions have four underlying factors in common: district-scale central thermal plants and distribution, sole ownership, high reliability needs and a long investment horizon. Like many university campuses around the country, the University of Illinois, Urbana-Champaign (UIUC) campus uses a microgrid to provide power to its facilities. Conclusion  
The U.S. higher education system ranks as the strongest in the world, besting all other countries because of its breadth of exceptional institutions and its reach to such a large percentage of the nation's youth. Still, it faces some significant headwinds, not the least of which is the increased demand for new infrastructure in the face of leveling See more on [assets.new.siemens centricabusinesssolutions](#)
