

Current solar panel cleaning

Overview

Regular Cleaning: Most panels should be cleaned every 6-12 months, depending on your environment. **After Dusty Seasons/Rains:** Clean after pollen season, sandstorms, wildfires, or heavy bird activity. **Turn Off the System**
Gently Rinse: Use a hose with clean, lukewarm water to. Regular solar panel maintenance is key to making sure your system stays efficient, whether it's cleaning off dirt or making sure everything's still working properly. While many homeowners enjoy watching their energy bill savings increase alongside solar electricity production, monitoring your solar system can be a daily or weekly routine to ensure everything is working as. With the changing seasons come new routines and practices: Raking leaves, clearing the gutters—and cleaning your solar panels to maximize their energy production. However, dust, pollen, bird droppings, and other debris can accumulate on their surface, creating a shadowy barrier that hinders their ability to absorb energy.
