This report offers comprehensive. On 7 March 2025, ACER submitted its proposal for a new EU-wide network code on demand response to the European Commission. What is demand response?

Demand response is when consumers (retail and industrial). Demand response is rapidly evolving from an "emergency resource" to a versatile, real-time grid management tool for meeting peak demand without relying on costly peaker plants or mega-investments in new generation assets. One company alone, Enel X, has blazed the trail in demand response, making it. The global demand response market is projected to grow significantly, from USD 35.1 billion by 2035, reflecting a strong CAGR of 12.3%, while commercial buildings will hold a dominant share in terms. Through Demand Response programs, utilities or grid operators pay commercial and industrial consumers to modulate their energy consumption in response to peaks in electricity demand. The utility avoids the cost of building new power.
