

Djibouti city energy transition

Overview

Since COP21 in 2015 Djibouti has made a strong commitment to energy transition. Today, our country generates around 80% of its energy from renewable sources – thanks mainly to the interconnection with Ethiopia and the development of the wind farm. Under the leadership of Yonis Ali Guedi, minister of energy since 2017, the country is increasing its solar and wind power projects. The aim is to reduce its energy dependence, limit.

Strengthening and ensuring energy independence in terms of electricity supply
Reducing fuel poverty among the population 100% energy green Integrate domestic renewable energies into the energy mix Make the power generation sector bankable to attract private investors Promoting energy efficiency.
challenges in ensuring reliable access to electricity for its growing population and economy. It represents all the energy required to supply end users in the country. Some of these energy sources are used directly while most are transformed into fuels or. Djibouti is on an ambitious path to achieve energy autonomy by 2035, aiming to produce 100% of its electricity from renewable sources.
