Overview

The Dominican Republic targets 300 MW of energy storage by 2027 to boost grid stability and renewables. Guided by an ambitious goal to reach 300. In a significant move to modernize the national power grid, the Unified Council of Electricity Companies (CUED) has unveiled a public tender for up to 600 megawatts (MW) of new renewable energy generation. Santos said a renewable energy tender this year, involving the National Energy Commission (CNE), would be. The Dominican government's latest renewable energy tender has triggered an overwhelming market response, with 32 solar and wind projects—most of them including battery energy storage—competing for just 600 MW. The process, to be decided in May 2026, could be expanded in future rounds given the. sustainable development. As a result of these measures, the amount of energy generated from renewable sources has more than doubled e its energy security.
