

Electric automobile battery technology

Overview

An electric vehicle battery is a rechargeable battery used to power the electric motors of a battery electric vehicle (BEV) or hybrid electric vehicle (HEV). In 2025, EVs made up over a quarter of new vehicle sales globally, up from less than 5% in 2020. The trend line toward automotive electrification is pointing up and to the right, even if its slope isn't constant. It affects driving range, performance, charging speed, cost, sustainability, and even vehicle design. Rapid advances in battery technology are propelling the electric vehicle. In a groundbreaking shift for the automotive industry, the latest innovations in electric vehicle battery technology promise to revolutionize performance, sustainability, and global energy dynamics.

As of 2024, the lithium-ion battery (LIB) with the variants Li-NMC, LFP and Li-NCA dominates the BEV market. The combined global production capacity in 2023 reached almost 2000 GWh with 772 GWh used for EVs in 2023. Most production is based in China where capacities increased by 45% that year. With their high energy density and long cycle life, lithium-ion batteries have become...

2025

2025 was a massive year on the battery front, packed full of promising breakthroughs and disappointing setbacks. Below, we've compiled some of the biggest battery developments of the year.

The Future of EV Batteries: What's Next?

Over the past decade, battery advancements have made EVs more practical and affordable, but we're just getting started. This article explores the most exciting developments shaping the next generation ...

The EV Battery Tech That's Worth the Hype. According to Experts

Major battery breakthroughs seemingly happen every day, but only some of that tech ever leaves the lab. WIRED breaks down what's actually going to change EVs and what's just a dream.

EV Battery Technology: What's Coming Now, Tomorrow, and

A look at the novel chemistries, pack strategies, and battery types that will power electric vehicles in the months, years, and decades ahead.
