Overview

In this comprehensive guide, we'll walk you through exactly how to determine your battery storage needs based on your specific goals, energy usage, and budget. Whether you're looking for backup power, bill reduction, or complete energy independence, you'll have a clear. Power and energy requirements are different: Your battery must handle both daily energy consumption (kWh) and peak power demands (kW). A home using 30 kWh daily might need 8-12 kW of instantaneous power when multiple appliances run simultaneously. This document offers a curated overview of the relevant codes and standards (C+S) governing the safe deployment of utility-scale battery energy storage. Home batteries store electricity from your solar system or the grid for use during outages, when the grid is most expensive, or at night when it is dark.
