

# Energy storage system price analysis table

## Overview

---

The interactive figure below presents results on the total installed ESS cost ranges by technology, year, power capacity (MW), and duration (hr). Department of Energy's (DOE) Energy Storage Grand Challenge is a comprehensive program that seeks to accelerate. In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an analysis of recent publications that include utility-scale storage costs. The suite of. This chapter, including a pricing survey, provides the industry with a standardized energy storage system pricing benchmark so these customers can discover comparable prices at different market levels. President-elect Trump has proposed a 60% tariff on all imports from China. If executed, turnkey grid-scale storage costs for Chinese systems could be US\$ 1,084 - 1,204 / kW.
