

# **Explosion-proof network cabinets for network data centers**

## Overview

---

These racks and server enclosures are designed to support mission-critical data center applications, providing exceptional security, airflow, and access management. Bring networking and computing exactly where you want it - like the factory floor or warehouse - with NEMA &. The new EXpressure cabinets are revolutionising the science of explosion protection. The wire mesh absorbs the heat energy and the pressure dissipates. Thus, the SR42UBZ has been designed and tested to meet Telcordia GR-63-CORE Network Equipment & Building Systems (NEBS) requirements for Zone 4 Seismic Earthquake Environments. We are renowned for our wide selection of server cabinets, including the PROTECTOR™, GUARDIAN™, and DEFENDER™ lines. FlexFusion™ Cabinets XG offer a unique universal platform.

## Explosion-proof network cabinets for network data centers

### [Explosion Proof Enclosure 48U NetShelter SX](#)

It is a tall and wide explosion proof junction box with 48U spaces for additional equipment and increased cable management options for high density server and networking applications. The cabinet also ...

### [Standard-Depth Server Rack Cabinet, Seismic Certified, 42U , Eaton](#)

SmartRack enclosures support cooling, cable management, power distribution and monitoring features that keep critical servers and network equipment operating nonstop.

### DETAILS AND PACKAGING
