

# Flexible photovoltaic bracket component name

## Overview

---

The invention relates to the technical field of brackets, and provides a flexible photovoltaic bracket suitable for complex terrains, which comprises steel upright posts, wherein a plurality of groups of steel upright posts are arranged, the number of each group of steel. The invention relates to the technical field of brackets, and provides a flexible photovoltaic bracket suitable for complex terrains, which comprises steel upright posts, wherein a plurality of groups of steel upright posts are arranged, the number of each group of steel. The utility model provides a flexible photovoltaic bracket, which comprises at least two bracket bodies, wherein steel beams are longitudinally arranged on the bracket bodies, a plurality of connecting plates are vertically arranged on the side surfaces of the steel beams at intervals along the. td. is Adjustable Solar Panel Bracket the roof of suspension structure and glass curtain wall. It is a photovoltaic al behavior of the photovo thus suitable for applications where weight is importa r more accurate diagnosis, treatment, and predictability. In the context of self-ligating brackets. Definition: Flexible photovoltaic brackets use prestressed flexible cable structures (such as prestressed steel strands) as the main force-bearing components to form a large-span photovoltaic module support system.

## Flexible photovoltaic bracket component name

---

### [Flexible photovoltaic bracket](#)

Flexible photovoltaic brackets have been proposed to replace traditional beam-supported photovoltaic modules. Flexible photovoltaic bracket refers to a bracket composed of flexible load-bearing ...

### [The classification of flexible photovoltaic brackets](#)

Flexible brackets are divided into the following types: single-layer cable structure, double-layer cable truss structure, fish-belly cable truss structure, and string structure.

### [Key Points of Flexible Photovoltaic Bracket Structure Design](#)

In the selection of materials, aluminum alloy, steel and other materials with high strength and corrosion resistance are commonly used to ensure the service life of the bracket in extreme environments.

### [Classification of mountain photovoltaic flexible brackets](#)

A photovoltaic bracket comprises a support component, wherein the support component is composed of at least two support structures; the rope assembly consists of three ropes which

[Features of cable structure flexible photovoltaic bracket](#)

Flexible photovoltaic bracket refers to a bracket composed of flexible load-bearing cables, steel columns, steel inclined columns or cable-stayed cables, steel beams and

[Flexible photovoltaic bracket suitable for complex terrain](#)

The invention relates to the technical field of brackets, in particular to a flexible photovoltaic bracket suitable for complex terrains.

[solar mounting component accessories](#)

Flexible photovoltaic supports break through the limitations of terrain and can be widely used in large-span complex terrain and "PV+" scenarios.

Detailed analysis of flexible photovoltaic brackets

Structural composition: Flexible photovoltaic brackets are mainly composed of foundations, steel structures and cable bodies, connection accessories, wind-resistant systems and other parts.

Flexible Photovoltaic Bracket-Suzhou Lunan Fastener System Co., Ltd

2?Compared to traditional brackets, flexible brackets can achieve larger spans and higher clearances, thereby increasing board capacity and power generation efficiency.

**CN220511040U**

The utility model relates to the technical field of photovoltaic brackets, in particular to a flexible photovoltaic bracket.
