

Glass solar film power generation scam

Overview

In this type of scam, fraudsters lure homeowners by offering "free" solar panels, claiming that government programs or grants will cover the entire cost of installation. The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy. Demand for solar-powered home systems has increased rapidly in the last several years. With that demand comes fierce competition within the solar panel market. Scams, schemes and straight-up fraud abound in the dark underbelly of an otherwise light-filled industry. Like any industry experiencing rapid growth, the solar sector isn't immune to unscrupulous practices and solar fraud. Some even. A solar panel scam traps homeowners in long-term financial and legal headaches, often before they realize what has happened. As solar energy adoption grew, dishonest companies exploited incentives, tax credits, and financing programs.
