

Grid modernization laos

Overview

Electricite du Laos (EDL), the state-owned power corporation, has unveiled plans to launch new energy initiatives and upgrade the national grid starting in the second quarter of 2025, aiming to meet soaring demand and curb reliance on imported electricity. Laos is accelerating its investment in renewable energy as the Southeast Asian nation intensifies efforts to meet its net zero emissions targets. With abundant natural resources and growing regional demand for clean power, the country is positioning itself as a key player in the green energy. Two major transmission projects, including a 500 kV cross-border line with China and a 230 kV domestic link, mark a new phase in Laos' power strategy. Laos: In early 2026, Laos launched two major power transmission projects to strengthen domestic and regional electricity connectivity.), Energy Security White Paper: Policy Directions for Inclusive and Sustainable Development for Lao PDR and the Implications for ASEAN. Operated by the EDL-T, a.
