

Hanergy photovoltaic panel identification

Overview

Hanergy solar tiles are not traditional solar panels mounted on top of your roof. The FLEX Series module is a CIGS based flexible thin-film PV module that provides high power density for many types of applications. Finally all visible surface of a curved solar roof tile can be efficiently used, making it possible to get maximum yield of a tile roof. Hanergy Holding Group Ltd. was established in 1994, with its head quarters in Beijing. It has branches in China, North America, Europe, Asia-Pacific and other regions. Hanergy is thus a clean-energy power. Hanergy America Solar Solutions sells solar modules and applications products, and develops solar projects throughout the Americas. Six R&D centers have been established by Hanergy in Beijing, Sichuan, Silicone Valley of the US, and Uppsala, Sw have a triple arch solar roof tile for the domestic market. Did you know Hanergy's latest modules.

Hanergy Technology

The panels are the highest efficiency, flexible, thin-film product on the market today, with >17% cell efficiency. The FLEX Series module bonds to surfaces with a simple peel-and-stick adhesive.
