

High-efficiency photovoltaic energy storage outdoor cabinets for fire stations

Overview

Combines high-voltage lithium battery packs, BMS, fire protection, power distribution, and cooling into a single, modular outdoor cabinet. Uses LiFePO₄ batteries with high thermal stability, extensive cycle life (up to 6000 cycles), and stable performance under load. It delivers clean, stable power for telecom base stations located in off-grid or unstable-grid environments. Scalable from Residential to Utility. In-house IoT EMS hardware and software provide cost-effective solutions for managing distributed energy. The Outdoor Photovoltaic Energy Cabinet is an all-in-one energy storage system with high strength, which can work under harsh environmental conditions to supply high-performance energy backup and regulation. It is built specifically for outdoor installation and integrates advanced LiFePO₄ battery. Think of it as a solar power station in a box hardy enough to brave the outdoors, smart enough to keep telecom Available in both 100kWh and 215kWh capacities, this modular system integrates power modules, batteries, cooling, fire protection, and environment monitoring in a compact outdoor cabinet. Designed for harsh environments and seamless integration, this IP54-rated solution features a 105KW bi-directional PCS, optional air- or liquid-cooled thermal. Voltsmile, a leading innovator in energy storage technology, specializes in manufacturing high-performance, durable, and smart outdoor energy storage solutions.
