

High-voltage photovoltaic folding container for chemical plants

Overview

High-efficiency Mobile Solar PV Container with foldable solar panels, advanced lithium battery storage (100-500kWh) and smart energy management. Ideal for remote areas, emergency rescue and commercial applications. Fast deployment in all climates. What is a solarfold photovoltaic container?

at full. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, enables rapid and. The deployable 130 kWp mobile solar solution.
