

# Homemade small fan made of photovoltaic panels

## Overview

---

To make a simple solar-powered fan, connect a small DC motor to a matching solar panel using alligator clips or wire. Attach a propeller or craft-blade to the motor shaft. Using simple materials and a mini solar. It's a bit late into the contest but we hope it is good!")This project is what we're entering for the Go Green contest. It's a cool solar powered mini-fan. This project will introduce them to the concepts of solar energy, circuits, polarity (anode and cathode), and the fundamentals of how electricity flows through a circuit. Adult supervision required, glue, pencil, propeller or small plastic fan blade, recycled cardboard or plastic bottle, ruler, scissors, small dc motor. Creating a mini solar fan working model involves assembling a small fan powered by a solar panel.
