

How is the photovoltaic panel business in Africa

Overview

Installations of solar power in Africa jumped 54% in 2025, new data shows, marking the fastest annual growth on record, driven by governments and development agencies deploying utility-scale projects and households and businesses putting in rooftop and commercial systems. African countries imported a record 15,032 MW of solar panels from China in the 12 months to June 2025, a 60% jump from the prior year. 57 GW —roughly three-quarters of the Hoover Dam's capacity. The Chinese solar panel export data gives. The Africa Market Outlook for Solar PV: 2026–2029 is the Global Solar Council's flagship annual analysis of solar and storage deployment across the African continent. Building on the latest market data, project tracking, import flows and forward-looking modelling, the report provides an up-to-date. The report shows that Africa installed approximately 4.5 GW of new solar PV capacity in 2025, representing a 54% year-on-year increase. Floating solar panels on the reservoir at Bui Power Station. The scale is striking: total panel imports to the continent hit roughly 15 gigawatts (GW) in the year to June 2025, a 60 per cent increase on the. Africa's solar power installations have increased sharply, driven by utility-scale projects and privately financed rooftop and commercial systems.
