

# How many energy storage power stations are there in Switzerland

## Overview

---

Switzerland has 604 power stations with an output of 300 kW or more, producing an average of 36,031 GWh/year of electricity. 6% is generated by run-of-river power plants, 48% by storage power plants, and 4. The following page lists power stations in Switzerland. The first significant combination of two technologies in Switzerland was the high-pressure hydroelectric power station on the Löntsch. Pumped-storage power stations are the most effective and economical solution.

## How many energy storage power stations are there in Switzerland

---

### [List of power stations in Switzerland](#)

Hydroelectric There are 556 hydroelectric power plants in Switzerland that have a capacity of at least 300 kW. Some of these are listed below: [1]

### [Power Plants in Switzerland \(Map\) , database.earth](#)

Data and information about power plants in Switzerland plotted on an interactive map.

### [List of power stations in Switzerland](#)

The following page lists power stations in Switzerland. For traction current see List of installations for 15 kV AC railway electrification in Germany, Austria and Switzerland.

### [Power market Switzerland , Axpo](#)

These include a hydropower reserve, the reserve power plant in Birr (AG) as well as pooled emergency power groups and combined heat and power plants. What is central for Axpo is that in order to ...

[Energy Storage Power Stations in Switzerland: Innovations...](#)

With 60% of its electricity already coming from hydropower, the country is now blending old-school reservoirs with futuristic battery tech. Think of it as a "Swiss Army knife" approach to ...

**Large-scale hydropower**

In Switzerland's hydropower plant statistics, a distinction is made between four types of plants: run-of-river (4'275 MW, 18'087 GWh/y), storage (8'257 MW, 17'722 GWh/y), pumped storage (3'517 MW, ...

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

**Hydropower in Switzerland**

Switzerland has 604 power stations with an output of 300 kW or more, producing an average of 36,031 GWh/year of electricity. Some 47.6% is generated by run-of-river power plants, 48% by storage ...

## [The development of the Swiss energy supply since 1800](#)

Today, there are 650 hydroelectric power plants in Switzerland and around 1,000 small hydropower plants - four times fewer power plants in total than 100 years ago.

## Hydropower in Switzerland

Overview  
Production  
History  
Installed capacity  
Energy policy  
Main dams  
Pumped storage power plants

According to the International Hydropower Association, Swiss hydropower production amounted to 34 TWh in 2022, or 0.8% of the world total; in Europe, Switzerland ranks 6th with 6.0% of the European total, behind Norway (22.7%), Sweden (12.3%), Turkey (11.6%), France (8.8%) and Austria (6.3%). In 2021, Swiss hydropower production accounted for 0.9% of the world total and ranked 7th in Europe with 5.7% of the European total.

## [Swiss solutions for storing the energy of tomorrow](#)

In Switzerland there are about 100 reservoirs for hydroelectric production, and about 15 of them have a pumping system.
