

How many wind solar and storage companies are there in Northern Europe

Overview

The continent is home to numerous innovative and influential renewable energy companies that are driving the transition towards a sustainable energy future. Image © Mordor. While significant progress has been made—with 26 out of 27 member states meeting their 2020 renewable energy targets—further deployment of renewable technologies such as solar, wind, hydropower, and bioenergy is crucial for achieving climate neutrality by 2050. Energy storage technologies are. Europe installed 16.4 GW of new wind power capacity in 2024. Europe now has 285 GW of wind power capacity, 248 GW onshore. The wind energy industry in Europe dates back almost forty years, with the continent's first wind farm opening in 1982 on the Greek island of Kythnos. [1] In 2017, a total of 15,680 MW of wind power was installed, representing 55% of all new power capacity, and the wind power generated 336 TWh of electricity, enough to supply 11.

[Wind energy in Europe: 2024 Statistics and the outlook for 2025-2030](#)

We expect Europe to install 187 GW of new wind power capacity over 2025-2030. The EU-27 should install 140 GW of this - 23 GW a year on average. This would bring total installations ...

[Top 20 Renewable Energy Companies in Europe](#)

Discover the top 20 renewable energy companies in Europe shaping a sustainable future. Explore key players, innovations, and their impact on green energy.

Wind energy in Europe

The industry has come a long way since then. The total wind power capacity in Europe has seen steady growth over the past years, reaching more than 268 gigawatts in 2024.

[Top 10: Renewable Energy Companies in Europe](#)

Recognising some of the most successful businesses in this space, delivering large sums of investment to the cause, we take a look at the top 10 renewable energy companies based in ...

Renewable energy in Europe

With the European Union striving to become carbon neutral by 2050, renewable energy investments will continue to be paramount in the future. However, as renewables accounted for ...

Wind power in Europe

WindEurope (formerly known as The European Wind Energy Association) has estimated that 230 gigawatts of wind capacity will be installed in Europe by 2020, consisting of 190 GW onshore and 40 ...

North Europe Renewable Energy Market

The North Europe Renewable Energy Market is growing at a CAGR of greater than 4% over the next 5 years. Ørsted AS, Vestas Wind Systems AS, Statkraft AS, E-CO Energi Holding As ...

Top 10 Energy Storage Companies in Europe

Discover the current state of energy storage companies in Europe, learn about buying and selling energy storage projects, and find financing options on PF Nexus.

Top Europe Renewable Energy Companies & How to Compare Them ...

The renewable energy sector in Europe is evolving rapidly. Countries are investing heavily in wind, solar, hydro, and emerging technologies to meet climate goals and energy independence.

Wind power in Europe

OverviewEU Wind Power PackageBy countryEurope's Wind Energy EventPublic opinionSee alsoExternal links

As of 2023, Europe had a total installed wind capacity of 255 gigawatts (GW). In 2017, a total of 15,680 MW of wind power was installed, representing 55% of all new power capacity, and the wind power generated 336 TWh of electricity, enough to supply 11.6% of the EU's electricity consumption. In Q4 2023, wind power exceeded coal in European electricity generation for the first...
