

# How much does it cost to install a photovoltaic bracket on the balcony

## Overview

---

On average, homeowners might spend between \$100 to \$300 per bracket, leading to a total installation budget heavily dependent on several factors: number of brackets, type of solar panels, and local labor rates. Installing solar panels for apartment balconies offers compelling benefits: potential electricity bill reductions of 10-30%, zero permanent modifications to rental properties, and the ability to take your solar investment with you when you move. This work has grown to include cost models for solar-plus-storage systems. NLR's PV cost benchmarking work uses a bottom-up. Installation for the average 5kW system ranges from \$11,100-\$22,400. [How Much Money Can You Save Using Solar?](#)

On average, homeowners save approximately 20% on their power bill when they switch to solar power. A variety of factors play a role in how much you'll save. Always check for available incentives or tax credits, which can significantly reduce your out-of-pocket costs.
