

How to activate solar powered lights

Overview

To ensure these eco-friendly lights function properly, you need to follow some simple steps: position them in direct sunlight, ensure the on/off switch is set to “on,” and fully charge the batteries for the initial use. Solar lights are an innovative and environmentally friendly way to illuminate outdoor spaces. Switching on our Solar Lights is quick and easy! Simply follow the instructions in this video to switch on your solar lights and you'll be good to go! For this demonstration we used our Small Robin Solar Light, but this works the same for all of our products that have Solar Lights attached. They consist of several key components: Solar Panel: This is the main component that converts sunlight into electrical energy. It is usually located on the top or side of the fixture.
