

How to discharge the photovoltaic panels after they are removed

Overview

To effectively discharge a flat panel wall-mounted solar panel, follow these steps: 1. Understand the panel's configuration and model; 2. Disconnect any connected load or battery storage system; 3. Before starting the disconnection process, shut off the DC and AC circuit breakers so there's no electrical load connected to the solar panels. An experienced technician will visit your property to assess the system, determine the best approach for removal, and provide you with a detailed plan of action. A comprehensive overview will.
