

Huawei solar panels in Burkina Faso

Overview

The plant, in the industrial zone of the Kossodo district of the Burkinabe capital, is expected to deliver 60-100 PV panels per day. Modules with power outputs ranging from 260 W to more than 330 W are being made at the XOF3. The Government of Burkina Faso has signed a Public-Private Partnership (PPP) agreement with a local developer and a Dutch clean energy investment firm to develop a major solar and battery storage system. The project is earmarked to deliver 150MWp of solar PV power integrated with a 50MW battery. Burkina Faso has taken a significant step toward a sustainable future by inaugurating West Africa's first solar panel factory, the Faso Energy Solar Panel Factory. This state-of-the-art facility, valued at \$50 million, will produce 200,000 solar panels annually. The aim is to increase access to clean.
