

Individual solar power generation subsidies

Overview

Personal-use solar power systems are eligible for a federal income tax credit under Sec. This credit is available only for the taxpayer's personal residence and equals up to 30% of the costs of qualified property installed. With the federal solar tax credit ending. Government subsidies for solar energy are a game-changer when it comes to getting homeowners on board with renewable energy sources. With a host of tax and incentive programs, there are many reasons for taxpayers to install solar power generation systems. Any system installed after this year won't qualify for the discount that's helped millions of households cut thousands off their installation costs.
