

Invest \$14 million in energy storage projects

Overview

Department of Energy (DOE) today announced \$14 million in funding for five front-end engineering design (FEED) studies that will leverage existing zero- or low-carbon energy to supply direct air capture (DAC) projects, combined with dedicated and reliable carbon storage. Companies in this space—ranging from startups innovating in battery technologies to established firms in grid management—offer systems that store energy from. The Long Duration Energy Storage (LDES) program invests in projects that accelerate the implementation of long duration energy storage solutions to increase the resiliency and reliability of our energy infrastructure and meet the state's energy and climate goals. Both states are within the service territory of the largest grid and wholesale market operator in the. OLYMPIA, WA - The Washington State Department of Commerce today announced 46 grants funded by the Washington Climate Commitment Act with additional state funding to boost clean energy technology innovation and support clean energy planning, design and construction projects throughout the state. A. Enchanted Rock, founded in 2006, develops, builds, owns and operates cost effective microgrids that help large commercial and industrial customers manage physical and financial risk associated with electricity. Leveraging a proprietary natural gas genset design, the company has deployed over 200MW.
