

Investment promotion for solar power generators

Voltage range:691.2-947.2V

>6000 cycles(100%DOD)

Rated battery capacity:
216KWH (customizable)

EMS communication:
4G/CAN/RS485

Overview

By leveraging federal tax credits, state rebates, and local grants, you can significantly offset the initial costs associated with installing these eco-friendly technologies. Tax benefits are available to taxpayers who generate their own electricity from solar power generation systems whether the system is for personal or business use. The solar Investment Tax Credit (ITC) is one of the most important federal policy mechanisms to support the growth of solar energy in the United States. Since the ITC was enacted in 2006, the U.S. solar industry has grown by more than 200x. SEIA has successfully advocated for multiple extensions of the ITC. Switch to solar with a system built for you. Going solar can lower your electric bills and your carbon footprint. The biggest hurdle for many households is the upfront cost. With the federal solar tax credit ending in 2022, if you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.
