

Is it easy to connect solar energy to the grid

Overview

While solar panels generate DC electricity, the grid operates using AC (alternating current) electricity. An inverter is needed to convert the electricity so that it can be used by the grid. Professional Installation is Critical: Grid-tied solar systems require licensed electricians and multiple permits, with the interconnection process typically taking 2-8 weeks and costing \$200-\$2,000 in fees alone. Whether you're a homeowner looking to reduce energy bills, a business aiming to lower operational costs, or simply. To connect solar panels to the grid, you need to install a bi-directional meter on your home.
