

Is it okay to install photovoltaic panels on the building surface

Overview

You need a permit to install solar panels on your home, and you should contact your local government and power company to apply for the necessary permits. Solar, or photovoltaic (PV) panels as they're referred to in NFPA 1, Fire Code, are becoming more and more common on one- and two-family dwelling and townhouse roofs. Since the 2016 edition of NFPA 1, access pathways have been required on roofs to facilitate fire service access as well as egress. Building codes for solar panel installation are crucial for ensuring the safety, efficiency, and longevity of solar energy systems. That whole system—the panels, the racks, the wiring—has to be engineered to survive. Why Follow Proper Building Codes When Installing Solar Panels?

Following proper.
