

Island-based photovoltaic energy storage cabinetized grid-connected type

Overview

In response to these issues, this paper proposes a grid-connected/island switching control strategy for photovoltaic storage hybrid inverters based on the modified chimpanzee optimization algorithm. was funded through the Sustainable Energy Industry Development Project (SEIDP). The. Photovoltaic System class="date">2024-08-22In islands or remote areas with insufficient and unstable grid coverage, solar photovoltaic systems are a cost-effective and practical power solution. However, they generally need to be paired with energy storage and backup power systems to ensure reliable. Marine and island power systems usually incorporate various forms of energy supply, which poses challenges to the coordinated control of the system under diverse, irregular, and complex load operation modes.
