

# Israel wind power generation technology

## Overview

---

Israel aims to reach 30% renewable energy consumption in 2030. [1] In 2023 Israel required all non private buildings to cover. Genesis Wind is the largest renewable energy project in Israel, highlighting our extensive greenfield development capabilities and our control over the entire project life cycle. Underpinning these trends is the. Israel is taking a monumental step in its clean energy journey with the Genesis Wind Project, a flagship initiative by Enlight Renewable Energy. This project is not just the country's first large-scale wind farm; it stands as Israel's largest renewable energy project to date, marking a significant. Enlight Renewable Energy announced Monday that it has begun to test the first of 39 General Electric wind turbines at the Genesis Wind project in the Golan Heights in northern Israel, which when operational will be the largest of all renewable energy projects in the country, including solar. With a total capacity of 207 MW, the wind.
