

# Latest Eastern European PV and energy storage policies

## Overview

---

It announced the plan alongside a review of member state National Energy and Climate Plans, stating it will streamline EU legislation and cut project approval times, including through updates to environmental rules, to accelerate renewable energy, grid infrastructure and. It announced the plan alongside a review of member state National Energy and Climate Plans, stating it will streamline EU legislation and cut project approval times, including through updates to environmental rules, to accelerate renewable energy, grid infrastructure and. The EU has developed a forward-thinking, supportive regulatory framework to encourage energy storage deployment as part of its ambitious clean energy and climate goals. Here's how the EU is leading the way: 1. Clean Energy for All Europeans Package The Clean Energy for All Europeans package. This position paper, prepared by the Energy Storage Europe Association, assesses the system value of long-duration energy storage, identifies barriers to deployment, and proposes recommendations to better align European energy, industrial, and financing frameworks with the long-term flexibility. The executive body of the European Union revealed the plan as it published a 'state of the nation' report into member state progress on ramping up clean energy by 2030. The European Commission has announced a European Grid Package, to be launched in the final quarter of the year, which will focus. These differences are not incidental but are the result of long-standing national and local policy systems. At the EU level, policy is transitioning from incentive-driven to obligation-based.
