

Machinery used for photovoltaic panel lifting

Overview

The Solar Panel Lifter system allows easy installation and manipulation of solar panel modules in field via attachment to a variety of mini-excavators. This system reduces worker fatigue and wind gust concerns, increases worker safety, and gently handles the delicate modules The Pallet Curler. Handling solar panels might look simple, but every lift, rotation, and movement carries risk. Panels are fragile, expensive, and easily damaged. Manual lifting exposes operators to strain injuries, while inefficient workflows can slow production and drive up costs.
