

# Madrid microgrid benefits

## Overview

---

Our prefabricated substation containers and commercial & industrial PV containers reduce installation costs by up to 50% and deployment time by 70% compared to traditional energy installations. Program of R&D activities between research groups of “Comunidad de Madrid”, co-funded with the European Social Fund and European Regional Development Fund (Ref: S2018/EMT-4366). PROMINT addresses the most important aspects of the deployment, management and optimization of urban electricity. Here are seven ways in which microgrids can help deliver the clean and reliable energy we need in the future. 7% of its power was from renewable sources in 2022. The country has big plans to increase this to 74% by 2030. Spain's warm sunshine, strong winds, and supportive.

## Madrid microgrid benefits
