

Masai safe flow battery

Overview

This dry charged, maintenance-free battery delivers reliable performance with a capacity range of 51-80AH, adhering to JIS and DIN standards for diverse vehicle requirements. Qingdao Masai Auto Parts Co. MASAI Battery is one of the early professional factories with vehicle starting lead-acid batteries as the leading products. Their unique design, which separates energy storage from power generation, provides flexibility and durability. In general, the Vanadium redox flow battery is the most developed and thus the most mature redox flow chemistry. What is unique about a flow battery?

Flow batteries have a chemical battery foundation. In most flow batteries we find two liquified electrolytes (solutions) which flow and cycle through. The longevity of flow batteries makes them ideal for large-scale applications where long-term reliability is essential.
