

Microfilm Waiting for the wind to stop State Grid

Overview

Hundreds of wind energy projects are having to wait years for permits to connect to the power grid in Europe - and the backlog is slowing the move to renewable energy, according to a new report by WindEurope. The wind power industry. The North American Electric Reliability Corporation (NERC) recently released its 2023-2024 Winter Reliability Assessment that evaluates the preparedness of the grid for winter weather conditions. In this article, a literature review is made on microgrid technology. According to the 2023 Global Energy Review, grid operators using this technology report 40% fewer outages and 22% cost reductions.
