

Mobile Energy Storage Container Exchange Project Quotation

Overview

The average quotation for a 100kW system in Texas or California now ranges from \$180,000 to \$260,000 – but why do prices vary wildly across states?

Let's unpack the numbers. Federal ITC extensions until 2032 now cover mobile solar + storage units, cutting your upfront costs by 30%. Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage technologies and for different purposes. Why do you need a solar container unit?

Our solar containers. Because mobile energy storage isn't just about batteries on wheels – it's about keeping concerts lit, construction sites humming, and emergency services running when the grid says “nope. These systems act as "power banks" for island grids, storing solar/wind energy during peak production and discharging when needed. Did you know 92% of Pacific.
